

Green Ideas

May 2024

Register for Love Your Burial Ground Week / Churches Count on Nature Week 2024

If you are running an event as part of the week in June, please register your event so it can appear on the list and map.

>> [Resources page \(templates and activity ideas\)](#).

To receive your two free Starter Guides and Guide to Wildlife in Burial Grounds in time for your event, please register by 23 May 2024.

Please [create an account to register your event](#) or login in to edit your event. You must be logged in to view this content.

Spotter's Guides

Butterfly Spotter's Guide

The UK has 59 species of butterflies – 57 resident species of butterflies and two regular migrants - the Clouded Yellow and Painted Lady.

Wildflower Spotter's Guide

Churchyards, cemeteries and other burial sites are often the oldest enclosed piece of land in the parish, town or city. The grassland will have been relatively undisturbed, reseeding naturally for hundreds of years.

>> [Wildflower Spotting Guide](#) [PDF]

Fungi Spotter's Guide

Churchyards and other types of old burial grounds are some of the best places to look for fungi. They often contain the kind of places that fungi thrive on – unfertilised grassland, aging trees, fallen branches and leaf covered ground.

Corvid Spotter's Guide

Have you ever struggled to tell a rook from a crow? This guide to Corvids (the family to which rooks and crows belong) is here to help you.

iNaturalist

iNaturalist is a free app for use on a smart phone that helps you identify what you have seen.

Caring for Gods Acre have set up a project called 'Beautiful Burial Grounds'. Give it a go and see what you can find!

>> [More info on the app and submitting records](#).
