| <b>CAUTION : Statistics only tell part of the story of a Church. Numbers alone do not indicate if a church is 'healthy' or not. There are many factors which go to determining health and vitality in a worshipping community and looking at numbers alone cannot give a true or accurate assessment in isolation.</b> |            |                               |                               |                             |   |  |  |                                    |
